1 June 1991

Dear Mr. Weisberg:

It is with some trepidation that I write to you, a feeling undoubtedly shared by all on first addressing directly one whom they have admired greatly from a distance over a considerable period of time. However, as a long-time "student" of yours, I have reached a point where my study of the Kennedy assassination requires that I obtain additional materials. It is with the hope of obtaining such materials, specifically, your classic texts on the subject, that I write to you.

Although I have managed to acquire over fifty titles related to

the JFK case, I have now ebcountered my primary source - Larry Weinberg, a Chicago book dealer and one-time assassination researcher (and pall-bearer of Jack Ruby) who claim to have met you in some capacity related to the case, and Dave Lovett, proprietor of The President's Box Bookshop, who suggested that I write to you and kindly provided me with your address. To get to the point of my letter, I am most interested in purchasing from you the titles in your "Whitewash" series that I have been unable to obtain: "Whitewash II - The FBI-Secret Service Cover-up," Photographic Whitewash," "Whitewash IV - Top Secret JFK

Assassination Transcript," and "Post Mortem - JFK Assassination Coverup Smoked."

I would be most grateful if you would send me any sort of listing of books you have available for purchase - new, used, hardback, or paperback. I do hope you will look kindly upon this request from a second-generation assassination researcher whose work (which will someday involve original research and writing, I hope) has been inspired in large part by your heroic and tireless efforts to present to the American people the truth regarding the events surrounding that "most odious" day.

Sincerely yours,

Dan Weiskopf
